

Intellectual Property Management

Your dedicated in-house partner in Intellectual Property Management specializing in Life Science, Healthcare and Pharma

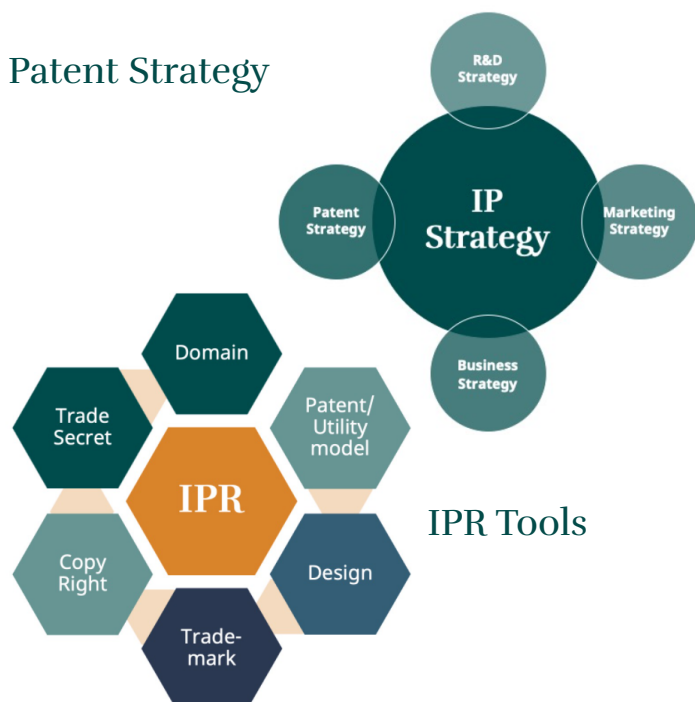

IP Management

- All kinds of in-house Intellectual Property activities.
- IP management tasks during a product development process.
- IP Management tasks prior to Due Diligence.
- Creating and maintaining good working relationships with many different IP law firms in EMEA & US.

Idea Handling

Idea handling	Advantages	Disadvantages
Keep secret	Nothing comes out	Others may patent your ideas
Patenting	Rights keep others away	Expensive & will be publish
Publish	Cheap & prevent others from patenting	Prior art

Patent Strategy

Being a small or medium-sized company, you may already have invested in Intellectual Property or are planning to do so, but are not confident that you have sufficient volume or resources to employ a multiple full-time IP manager.

I work as your trusted in-house IP Consultant helping you manage your IP activities, as supplement to your IP law firm, in a close dialogue with your top inventors and the management team to ensure your IP investment by developing IP protection and risk mitigation strategies and aligning IP with R&D and Business Development.

Karin Løwenstein Sterup

Has more than 20 years of experience from Life Science

Holds a MSc and a PhD in Pharmacy and have solid insight in pharmacy, chemistry, biochemistry, biology and microbiology.
